| | **Notes:** | If there are several records since 2006 then earlier records have not generally been investigated |
| | | Where 'years seen' is blank this signifies the species has been seen most years since 2006 at least |
| | | A year in red indicates that all records for that year are still pending acceptance by the relevant Rarity Committee |
| | | * The 16 Lesser White-fronted Geese seen in 2025 were from a reintroduction scheme in Sweden |
| | | Records prior to 2021 which do not appear to have been submitted to the rarity committees or are not being actively considered, have been removed from this list. |

| | **Taxonomy changes:** | BOU have recently decided to adopt the new AviList global avian taxonomy, so we have used that here. It does mean we have lost four species since the last publication of this report, and these are shown as subspecies in this list. These are: |
| | | Green-winged Teal — now lumped with Teal |
| | | Balearic Shearwater — now included in Yelkouan as a subspecies |
| | | Hooded Crow — is lumped with Carrion |
| | | Siberian Stonechat — this now includes Amur or Stejnegeri as a subspecies, |
